DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, 26-44 and 85, drawn to a method for capturing call event data in a telecommunications network, classified in class 379, subclass 88.22.
- II. Claims 45-59, drawn to an interface for generating a file in XML, classified in class 709, subclass 230.
- III. Claims 60-72, drawn to a communications network for establishing communications session, classified in class 709, subclass 227.
- IV. Claims 73-84, drawn to data structure formatted as an XML document file, classified in class 707, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II, III and IV have separate utility such as recording call events in a data structure or format other than XML and creating XML file for recording files other than call events. See MPEP § 806.05(d).

Art Unit: 2155

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
